## BIOTECHNICS

- **Bactericidal** • **Virucidal** • **Fungicidal** • **Sporicidal**

### Trigger Spray

Our trigger spray is the perfect product to sanitise all hard surface areas following removal of visible cleaning. All known pathogens will be eradicated (log 6 reduction) within less than 30 seconds.

### Hand Sanitizer - 100 % free of alcohol

Sanilution Biotechnics Hand Sanitizer is kind to the skin but effective at eliminating 99.999% (log 5 reduction) of all known pathogens.

Because the solution is **alcohol free** it is rapidly becoming the favorite sanitizer for frequent users. Unlike alcohol based alternatives, the Sanilution Biotechnics hand sanitizer does not cause cracking or irritation to skin.

Sanilution Biotechnics can supply dispensers for the hand sanitizer.

### Hard Surface Cleaner

Sanilution Biotechnics surface cleaner is supplied in ready to use 5 litre containers for use on floors, walls and large surface areas.

No need to dilute, the cleaner can be poured directly into mop buckets and applied on the hard surface. It will even decontaminate existing mops and buckets if left to sit for a minimum of 30 seconds before use.
